Shared Preferences
in Flutter
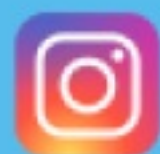

Quick Look

A Flutter plugin used for platform-specific persistent storage that reads and writes simple key-value pairs.

Add Package

```
1    shared_preferences 2.0.6
```
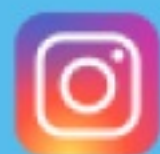

Write Data

```
1  Future<void> saveMyName(String name) async {
2    final prefs = await SharedPreferences.getInstance();
3    prefs.setString('name', name);
4  }
```

Read Data

```
1  Future<void> getMyName() async {
2      final prefs = await SharedPreferences.getInstance();
3      setState(() {
4        name = prefs.getString('name') ?? "Name not found";
5      });
6    }
```

Delete Data

```dart
Future<void> removeMyName() async {
  final prefs = await SharedPreferences.getInstance();
  prefs.remove('name');
}
```

Accepted DataTypes
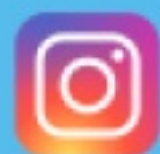

String   -   setString(), getString()

Int   -   setInt(), getInt()

Bool   -   setBool(), getBool()

Double   -   setDouble(), getDouble()
